info

I tried it several times and just now again on the PeopleSoft login page. I did a copy and past of the login and typed it manually as well. Just leaves me at the log in page.

What about changing the password for bbohannon? Can I just do that?

It works, I tried it before I sent it to you and I just logged in again.

DeLing/TomorrowNow Subject PeopleSoft login info

Good morning,

During testing of a new module to Titan Peoplesoft I tried to log in manually to the site and the site is prompting me to change the password. Current user & pass is bbohannon and guitar3. Is this a valid customer still, or can I change the password to what I want??? I need an answer soon as this is holding up development. Thanks.
